Forecast For Wales
Issued by Met Office Exeter
at 0400 on Monday 13 Sep 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy throughout with intermittent rain.

Today:
Quite a cloudy day across the country, with intermittent outbreaks of light rain throughout. Southwestern areas will see the odd heavier downpour into the afternoon, as rain becomes more showery. Maximum temperature 19 deg C (66 deg F).

Tonight:
Heavier rain becomes widespread across the southwest through the evening, then is likely to move north overnight with a few rumbles of thunder possible. Drier in the southwest by dawn. Minimum temperature 13 deg C (55 deg F).

Tuesday:
A wet day in the north and east, with widespread rain, heavy and possibly thundery in places. Becoming drier and brighter for all into the evening as rain clears. Maximum temperature 20 deg C (68 deg F).

Outlook for Wednesday to Friday:
Misty starts in places on Wednesday and Thursday, then becoming fine and largely dry with sunny spells, feeling warm in these. Wet and windy Friday morning, becoming drier later.
